ACHIEVEMENTS

Improved site load time by 30%, increased user engagement by 20%, and optimized UI for a 15% boost in user retention.

Developed and optimized user interfaces for key products, including Cssky Dashboard, Fanflare, and Jet Support, ensuring responsiveness and cross-browser compatibility.

Collaborated with backend teams to integrate APIs and enhance frontend performance, resulting in faster load times and improved data visualization.

Utilized a diverse technology stack, including React.js, Next.js, Tailwind CSS, and Redux, to create efficient and scalable frontend solutions.

Implemented best practices for accessibility, ensuring all products are usable by individuals with disabilities.

Managed state efficiently across complex applications using Redux and React Context API.

PROJECTS

Drowsy Guard

Frontend Developer | 07/2024 – 10/2024

Developed and maintained responsive web applications for a **drowsiness detection** system using **React.js**, **TypeScript**, and **Tailwind CSS** in conjunction with a **Python-based AI model**.

- Collaborated with UX/UI designers to create intuitive and user-friendly interfaces.
- Integrated frontend components with a **computer vision AI model** built in Python to detect drowsiness in real-time.
- Developed reusable components and optimized code for enhanced performance and reduced load times.
- Ensured code quality through best practices, including code reviews and refactoring.
- Worked closely with backend developers to integrate **RESTful APIs** for seamless communication between the frontend and the AI model.
